SUPPORTS

ErgoPerfect® ergonomic supports are ideal for use during work and other physical activities. The unique properties of the neoprene blend retain the therapeutic heat, generated by your body.

This aids circulation and helps keeping your muscles pliable, thus helping to treat injuries and reduce susceptibility of new injury.

Custom fit hook and loop strap allows maximal tension control and desired level of compression.

Neoprene blend provides compression, support and heat retention, which improves circulation, helps keeping muscles and joints flexible and promotes healing.
